

CARMIGNAC PORTFOLIO EMERGENTS
ENVIRONMENTAL, SOCIAL, GOVERNANCE AND
HUMAN RIGHTS INDICATORS

In addition to 30+ ESG indicators of company data that can be monitored on the Carmignac proprietary ESG system START, the Carmignac Portfolio Emergents fund tracks the progress of 5 specific E, S, G and Human Rights indicators* for the fund, a set of quantifiable data points established as performance measures. They seek to compare and manage the evolution of these indicators against the reference index and across companies. They also serve to drive further research and corporate engagement. Following the evolution of the requirements from the French SRI Label, we are committed to maintain a coverage above 70% for the carbon intensity and 90% for the Human Rights Controversies, while outperforming the benchmark on these two particularly relevant indicators, in line with our investment philosophy.

**Carbon data is monitored monthly, the other S, G and HR indicators are monitored yearly.

 - A proportion by weight of at least 50% of companies in portfolio with a board independence of more than 50%
- ▶ Human Rights – Number of Human Right supply chain controversies
 - Less controversies than the reference indicator
- ▶ Human Rights – Number of UNGC Human Right controversies
 - Less controversies than the reference indicator
 - Fund's coverage above 90%

Definition & Calculation Methodology

- ▶ E - Carbon Emissions:
 - Source: MSCI
 - Definition: Portfolio carbon footprint as the tons of CO2e per million Euros of revenues (t CO2e/ €M revenue). The sub fund's CO2 emissions target was to have a tCO2/M€ invested level below the reference indicator and close to the MSCI Low Carbon target index.
 - Calculation: The companies' carbon intensities (tonnes of CO2e /USD mn revenues converted to Euros, (Scope 1 and 2 GHG Protocol), S&P Trucost) are weighted according to their portfolio weightings (adjusted for holdings for which carbon emissions are not available), and then summed.

- ▶ **S – Number of product safety controversies:**
 - Source: MSCI ESG
 - Definition: This figure represents the number of controversies related to product safety & quality in which the company has been involved in the past three years for which the ESG Controversies severity as identified by MSCI assessment is 'Severe' & 'Very Severe'. The severity scale runs None-Minor-Moderate-Severe-Very Severe
 - Calculation: The total number of controversies for the portfolio and reference indicator over past 3 years

- ▶ **G – Board Independence:**
 - Source: MSCI ESG
 - Definition: The percentage of board members that meet MSCI designated criteria for independence i.e. non-executive and independent of management. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.
 - Calculation: The proportion by weight of the companies held by the fund or reference indicator covered by MSCI ESG which more than 50% of the board is independent. The reported data is based on the most recent assessment by MSCI ESG.

- ▶ **Human Rights – Number of supply chain controversies:**
 - Source: MSCI ESG
 - Definition: This figure represents the number of controversies related to supply chain labour standards as identified by MSCI in which the company has been involved in the past three years (if any) for which the ESG Controversies severity assessment is 'Severe' and 'Very Severe'. The severity scale runs None-Minor-Moderate-Severe-Very Severe
 - Calculation: The total number of controversies for the portfolio and reference indicator over 3 years.

- ▶ **Human Rights – Number of Controversies (UN Global Compact):**
 - Source: ISS ESG
 - Definition: Companies that severely violate the Human Right Principles of UN GC
 - Calculation: The number of companies that violate the Human Right Principles of UN GC
