

CARMIGNAC PORTFOLIO CREDIT A EUR ACC

LUXEMBOURG SICAV SUB-FUND

Recommended minimum investment horizon:

3 YEARS

LU1623762843

Monthly Factsheet - 28/03/2024

INVESTMENT OBJECTIVE

Carmignac Portfolio Credit is an international fixed income UCITS that implements credit strategies across the globe. Its flexible and opportunistic style enables the Fund to implement an unconstrained and conviction-driven allocation. The fund aims to outperform its reference indicator over a minimum recommended investment period of 3 years.

Fund Management analysis can be found on P.3

FUND MANAGEMENT ANALYSIS

MARKET ENVIRONMENT

Central bank meetings held no big surprises in March, although the Bank of Japan did bring an end to its negative interest rate policy by raising its key rate from -0.1% to a range of 0%–0.1%. However, the prospect of coordinated easing by the European Central Bank and the Federal Reserve seems to be receding as US growth and inflation figures remain higher than expected. Despite a dovish tone, the Federal Reserve has been forced to revise its growth forecasts upwards for the cycle ahead. The consumer price index beat traders' forecasts once again at +3.2% y/y, after another disappointing publication the previous month, while core inflation remains well above target at 3.8%. Other indicators were just as robust, and include retail sales and industrial production, which rebounded in February. Job growth of 275,000 over the month was also surprisingly high. The trend in Europe is more subtle as countries show a little more fiscal orthodoxy to meet EU deficit requirements. However, the publication of leading indicators (PMIs) was encouraging with an improvement in services activity, which is now settled in expansionary territory, and signs that consumer confidence is returning. The ECB put out a reassuring message, lowering its inflation forecasts even though services inflation is stuck at 4% and commodity price pressures seem to be mounting after easing considerably in 2023.

PERFORMANCE COMMENTARY

The Fund delivered a positive absolute return for March, in line with its reference indicator. Our portfolio benefitted from its main investment themes, whether investment grade or high yield, such as financials, energy, special cases and restructuring. Our collateralised loan obligations also had a positive effect.

OUTLOOK AND INVESTMENT STRATEGY

We are still concentrating on our main investment themes through a selection of high yield bonds (e.g. in the energy and financial sectors), which are less sensitive to higher interest rates, and collateralised loan obligations (CLOs) with a variable-rate structure, limiting the negative effects of interest rate volatility and rising default rates. In these volatile conditions, we kept our credit market hedging strategies at 20% to protect the portfolio from the risk of further market dislocation, while focusing on alpha. After remaining low for several years due to the liquidity glut and low cost of capital, default rates will probably return to more normal levels, which we view as a catalyst likely to create real stand-out opportunities. The portfolio's high carry (over 7%) and attractive credit valuations should mitigate short-term volatility and generate medium- and long-term performance.

GLOSSARY

Active Management: An investment management approach where a manager aims to beat the market through research, analysis and their own judgement. See also Passive management.

Bottom up investing: Investment based on analysis of individual companies, whereby that company's history, management, and potential are considered more important than general market or sector trends (as opposed to top down investing).

Credit cycle: A credit cycle describes the different phases of access to credit by borrowers. It alternates between periods of easily accessible funds to borrow due to low interest rates and periods of contraction where lending rules are more restrictive and interest rates are higher.

Forward financial instruments: A forward contract is a customized contract between two parties to buy or sell an asset at a specified price on a future date. A forward contract can be used for hedging or speculation, although its non-standardized nature makes it particularly apt for hedging. Unlike standard futures contracts, a forward contract can be customized to any commodity, amount and delivery date. A forward contract settlement can occur on a cash or delivery basis.

High yield: A loan or bond rated below investment grade because of its higher default risk. The return on these securities is generally higher.

Investment grade: A loan or bond that rating agencies have rated AAA to BBB-, generally indicating relatively low default risk.

Net asset value: Price of all units (in an FCP) or shares (in a SICAV).

Non-benchmarked: Portfolio construction is a result of Fund manager views and market analysis with no bias to any benchmark.

SFDR Fund Classification: Sustainable Finance Disclosure Regulation (SFDR) 2019/2088. EU Act that requires asset managers to classify funds into categories, "Article 8" funds promote environmental and social characteristics, "Article 9" funds have sustainable investments as a measurable objective. In addition to not promoting environmental or social characteristics, "Article 6" funds have no sustainable objectives. For more information, please refer to <https://eur-lex.europa.eu/eli/reg/2019/2088/oj>

SICAV: Société d'Investissement à Capital Variable (Open-ended investment company with variable capital)

UCITS: Undertakings for Collective Investments in Transferable Securities.

UCITS funds are authorised funds that can be sold in any country in the EU. UCITS III regulations allow funds to invest in a wider range of financial instruments, including derivatives.

Yield to Maturity: Yield to Maturity corresponds to the concept of actuarial yield. It is, at the time of calculation, the estimated rate of return offered by a bond in the event it is held until maturity by the investor. Note that the yield shown does not take into account the FX carry and fees and expenses of the Fund.

(1) of the amount you pay in when entering this investment. This is the most you will be charged. Carmignac Gestion doesn't charge any entry fee. The person selling you the product will inform you of the actual charge.

(2) We do not charge an exit fee for this product.

(3) of the value of your investment per year. This estimate is based on actual costs over the past year.

(4) of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on the quantity we buy and sell.

(5) when the share class overperforms the Reference indicator during the performance period. It will be payable also in case the share class has overperformed the reference indicator but had a negative performance. Underperformance is clawed back for 5 years. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years, or since the product creation if it is less than 5 years.

(6) Please refer to the prospectus for the minimum subsequent subscription amounts. The prospectus is available on the website: www.carmignac.com.

MAIN RISKS OF THE FUND

CREDIT: Credit risk is the risk that the issuer may default. **INTEREST RATE:** Interest rate risk results in a decline in the net asset value in the event of changes in interest rates. **LIQUIDITY:** Temporary market distortions may have an impact on the pricing conditions under which the Fund might be caused to liquidate, initiate or modify its positions. **DISCRETIONARY MANAGEMENT:** Anticipations of financial market changes made by the Management Company have a direct effect on the Fund's performance, which depends on the stocks selected.

The Fund presents a risk of loss of capital.
